

Programme Specific Outcome-Physics Honours

PSO-1: This course allows to make a strong knowledge foundation of the students to implement it for the benefit of the society via research in near future.

PSO-2: This course allows the students to recapitulate basic concepts of physics. They will be able to apply the knowledge of basic science principles in solution of complex problems of scientific and technical interests.

PSO-3: This course allows the students to analyse complex scientific problems using computational skills.

PSO-4: This course allows the students to apply scientific techniques and formulate laws and solve problems pertaining to applied science.

PSO-5: This course allows the students to apply appropriate techniques, resources of modern technology and IT tools for prediction and modeling of science problems.

PSO-6: This course allows to make a strong knowledge foundation of the students to implement it for the benefit of the society via research in near future.
